

# How to Write an Effective Technical Paper

Saifur Rahman, PhD

President, IEEE Power & Energy Society 2018 & 2019

Professor, ECE Department, Virginia Tech, USA

Invited Talk, IEEE PES Student Chapter

Georgia Tech, 28 January 2021

## Webinar Speaker,

Saifur Rahman, Ph.D.  
Professor and Director  
Virginia Tech Advanced Research Institute

### Education

Ph.D., Electrical Engineering, Virginia Polytechnic Institute and State University, 1978.  
M.S., Electrical Sciences, State University of New York at Stony Brook, 1975.  
B.Sc., Electrical Engineering, Bangladesh University of Engineering and Technology, Dhaka, 1972

### Professional Society Activities

- IEEE Member since 1975, Fellow 1998, Life Fellow 2014
- President, IEEE PES, 2018-2019
- Vice president, Publications, IEEE PES, 2001-2003, 2012-2013
- Vice President, Publications, IEEE, 2006
- Editor-in-Chief, IEEE Transactions on Sustainable Energy, 2010-2012
- Editor-in-Chief, IEEE Electrifications Magazine, 2013-2014
- Launched, the IEEE Power & Energy Technology Systems Journal (Open Access), 2014

# Audience

**Audience**

## **Basic Questions**

1.Are you writing this paper for the sake of writing a paper?

2.Or do you want to show how others can benefit from your work?

## Audience

# Scientific research publishing

- Who writes scientific papers?
  - Engineers, scientists, educators and researchers from:
    - Corporations
    - Academia
    - Government
  - Students typically write and present conference papers before submitting journal articles

## Audience

# What IEEE editors and reviewers are looking for

- Content that is appropriate, in scope and level
- Clearly written original material that addresses a new and important problem
- Extension of previously published work
- Valid methods and rationale
- Illustrations, tables and graphs that support the text
- References that are current and relevant to the subject

## Audience

# How does the review process work?

- Editor-in-Chief gets the paper after it goes through content match check (iAuthenticate) and “banned author” check
- If the paper is in scope for the journal, it is assigned to an editor (associate editor)
- Editor assigns the paper to five or more reviewers
- Reviewers send their comments back to the editor
- Editor makes a recommendation to the EIC as follows:
  - Accept
  - Revise & Resubmit
  - Reject
- The EIC makes the final decision and informs the corresponding author

## Audience

# Why IEEE editors and reviewers reject papers

- The content is not a good fit for the publication
- There are serious scientific flaws:
  - Inconclusive results or incorrect interpretation
  - Fraudulent research
- It is poorly written
- It does not address a big enough problem or advance the scientific field
- Most of the work was previously published
- The quality is not good enough for the journal
- Reviewers have misunderstood the article

# Structure

# Paper Structure

## Elements of a manuscript

Title

Abstract

Keywords

Introduction

Methodology

Results/Discussions/Findings

Conclusion

References

## Paper Structure

# Title

An effective title should...

- Answer the reader's question:  
*"Is this article relevant to me?"*
- Grab the reader's attention
- Describe the content of a paper using the fewest possible words
  - Is crisp, concise
  - Uses keywords
  - Avoids jargon

Good  
Title

VS.

Bad  
Title

## Title Dos and Don'ts

✓ *A Human Expert-based Approach to Electrical Peak Demand Management*

**VS**

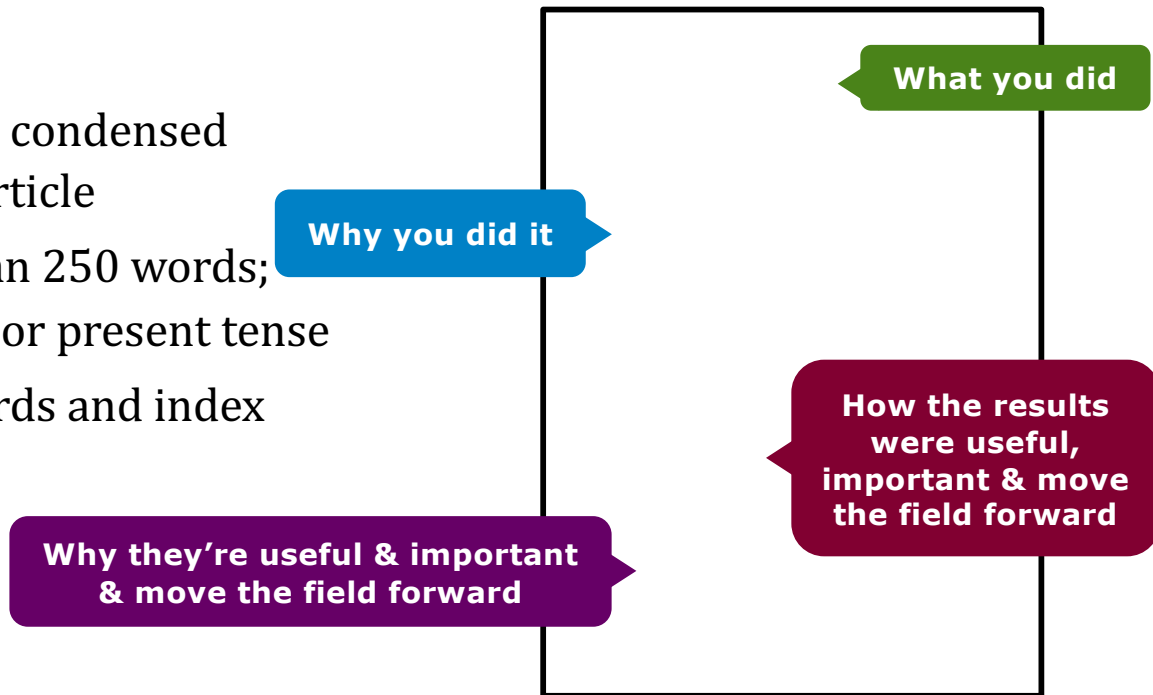

✗ *A **better** approach of managing **environmental and energy sustainability** via a study of different methods of electric load forecasting*

## Paper Structure

# Abstract

A “stand alone” condensed version of the article

- No more than 250 words; can use past or present tense
- Uses keywords and index terms

## Paper Structure

# Abstract Dos and Don'ts

The objective of this paper was to propose a human expert-based approach to electrical peak demand management. The proposed approach helped to allocate demand curtailments (MW) among distribution substations (DS) or feeders in an electric utility service area based on requirements of the central load dispatch center. Demand curtailment allocation was quantified taking into account demand response (DR) potential and load curtailment priority of each DS, which can be determined using DS loading level, capacity of each DS, customer types (residential/commercial) and load categories (deployable, interruptible or critical). Analytic Hierarchy Process (AHP) was used to model a complex decision-making process according to both expert inputs and objective parameters. Simulation case studies were conducted to demonstrate how the proposed approach can be implemented to perform DR using real-world data from an electric utility. Simulation results demonstrated that the proposed approach is capable of achieving realistic demand curtailment allocations among different DSs to meet the peak load reduction requirements at the utility level.

### Vs

This paper presents and assesses a framework for an engineering capstone design program. **We explain** how student preparation, project selection, and instructor mentorship are the three key elements that must be addressed before the capstone experience is ready for the students. **Next, we describe** a way to administer and execute the capstone design experience including design workshops and lead engineers. **We describe the importance** in assessing the capstone design experience and report recent assessment results of our framework. **We comment** specifically on what students thought were the most important aspects of their experience in engineering capstone design and provide quantitative insight into what parts of the framework are most important.

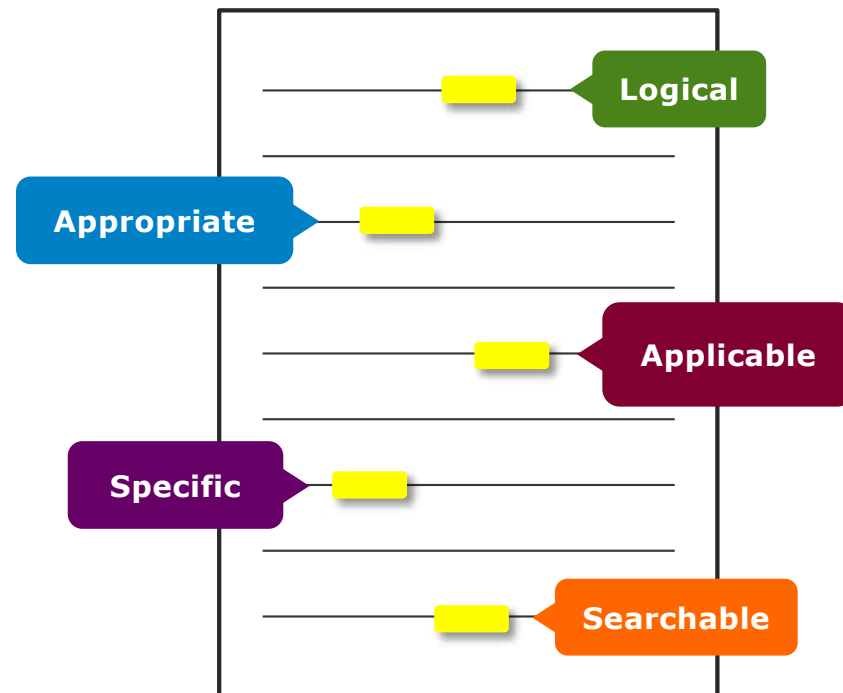

***First person, present tense***

***No actual results, only describes the organization of the paper***

## Paper Structure Keywords

Use in the Title and  
Abstract for enhanced  
Search Engine Optimization

## Paper Structure

# Introduction

- A description of the problem you researched
- It should move step by step through:

- The introduction should be:
  - Specific, not too broad or vague
  - About 1-2 pages
  - Written in the present tense

## Paper Structure

# Methodology

- Problem formulation and the processes used to solve the problem, prove or disprove the hypothesis
- Use **illustrations** to clarify ideas and support conclusions:

### Tables

Present representative data or when exact values are important to show

### Figures

Quickly show ideas/conclusions that would require detailed explanations

### Graphs

Show relationships between data points or trends in data

## Paper Structure

### Results/discussion

Demonstrate that you  
solved the problem or  
made significant advances

## Results: Summarizes the Data

- Should be clear and concise
- Use figures or tables with narrative to illustrate findings

## Discussion: Interprets the Results

- Why your research offers a new solution
- How can it benefit other researchers professionals

## Results

## Paper Structure

# Conclusion

- Explain what the research has achieved
  - As it relates to the problem stated in the Introduction
  - Revisit the key points in each section
  - Include a summary of the main findings and implications for the field
- Provide benefits and shortcomings of:
  - The solution presented
  - Your research and methodology
- Suggest future areas for research

# Paper Structure References

- Support and validate the hypothesis your research proves, disproves or resolves
- There is no limit to the number of references
  - But use only those that directly support your work (about 30)
- Ensure proper author attribution
  - Author name, *article title*, publication name, publisher, year published, volume and page number, Digital Object Identifier (DOI)

Properly  
cited  
material

1578

IEEE TRANSACTIONS ON SMART GRID, VOL. 5, NO. 4, JULY 2014

We thus have

$$(P_1^{k+} + P_1^{k-})^2 - (P_1^{k+} - P_1^{k-})^2 + 4P_1^{k+}P_1^{k-} < (\hat{P}_1^{k+} - \hat{P}_1^{k-})^2 + 4\hat{P}_1^{k+}\hat{P}_1^{k-} - (\hat{P}_1^{k+} + \hat{P}_1^{k-})^2, \quad (32)$$

Since  $P_1^{k+} - P_1^{k-} = \hat{P}_1^{k+} - \hat{P}_1^{k-}$ , we then have  $P_1^{k+} < \hat{P}_1^{k+}$ , and  $P_1^{k-} < \hat{P}_1^{k-}$ . Because the operational cost is an increasing function of  $(P_1^{k+}, P_1^{k-})$ , we obtain that

$$c_{\text{eff}}(P_1^{k+}, P_1^{k-}) < c_{\text{eff}}(\hat{P}_1^{k+}, \hat{P}_1^{k-}). \quad (33)$$

Therefore the optimal pair  $(P_1^{k+}, P_1^{k-})$  must satisfy that  $P_1^{k+}P_1^{k-} = 0$ , i.e., only one of  $P_1^{k+}, P_1^{k-}$  can be non-zero. ■

Feng Yang (STI) received the B.Sc. degree in electrical engineering from University of Science and Technology, Anhui, China in 2009, and the M.Sc. and Ph.D. degrees in electrical engineering from Washington University in St. Louis, St. Louis, MO, USA, in 2011 and 2014, respectively. His Ph.D. advisor is Dr. Arne Nehorai.

Arne Nehorai (5700-MT3-SM'90-F'94) received the B.Sc. and M.Sc. degrees from the Technion, Haifa, Israel, and the Ph.D. degree from Stanford University, Stanford, CA, USA.

He is the Eugene and Martha Lehman Professor and Chair of the Prouty M. Green Department of Electrical and Systems Engineering (ESE) at Washington University in St. Louis (WUSTL), St. Louis, MO, USA. Earlier, he was a faculty member at Yale University and the University of Illinois at Chicago.

Dr. Nehorai served as Editor-in-Chief of IEEE TRANSACTIONS ON SIGNAL PROCESSING from 2000 to 2002. From 2003 to 2005 he was the Vice President of the IEEE Signal Processing Society (SPS), the Chair of the Publications Board, and a member of the Executive Committee of this Society. He was the founding Editor of the special columns on Leadership Reflections in IEEE Signal Processing Magazine from 2003 to 2006. He has been a Fellow of the IEEE since 1994, the Royal Statistical Society since 1996, and the AAAS since 2012.

# Who should be on the Authors' list

## A Report

A report documents in detail the work done including results for a project and has a lead author and other multiple authors

## A Technical Paper

- It highlights one or more aspects of a report
- Multiple papers can come out of one report
- Include any and all who have contributed to the writing of the paper
- Others can be acknowledged

# Ethics

## Ethics

# Types of misconduct

### Conflict of Interest

- A financial or other relationship with the publication at odds with the unbiased presentation of data or analysis.

### Plagiarism

- Copying another person's work word for word or paraphrasing without proper citation.

### Missing Author Attribution

- Must be given if you use another author's ideas in your article, even if you do not directly quote a source.

## Ethics

# Ethical publishing

### Plagiarism

- Avoid plagiarism
  - Cite and separate any verbatim copied material – **but how much?**
  - Paraphrase other's text properly, and include citation
  - Credit any ideas from other sources
  - Familiarize yourself with IEEE Policies

**Refer to our Tips Sheet**  
[http://www.ieee.org/publications\\_standards/publications/authors/plagiarism\\_and\\_multiple\\_submissions.pdf](http://www.ieee.org/publications_standards/publications/authors/plagiarism_and_multiple_submissions.pdf)

## Ethics

# Ethical publishing

### Duplication, Redundancies & Multiple Submissions

- Author must submit original work that:
  - Has not appeared elsewhere for publication
  - Is not under review for another refereed publication
  - Cites previous work
  - Indicates how it differs from the previously published work
  - Authors **MUST** also **inform the editor** when submitting any previously published work

**Refer to our Tips Sheet**  
[http://www.ieee.org/publications\\_standards/publications/authors/plagiarism\\_and\\_multiple\\_submissions.pdf](http://www.ieee.org/publications_standards/publications/authors/plagiarism_and_multiple_submissions.pdf)

# Where to Publish?

# Traditional Journals -

Articles available through subscription

# Open Access Journals –

Author pays, free download

# Hybrid Journals –

Most articles are traditional, some are open access (author preference)

# Open Access Publications

## Next Steps

# Open Access Opportunity for IEEE Authors (Author pays model)

IEEE provides 3 open access publishing options to meet the varying needs of authors:

- New multidisciplinary journal, **IEEE Access**
- 100+ Hybrid journals
- Fully open access topical journals

<http://open.ieee.org/>

## PES Full Open Access Option #1

### IEEE Open Access Journal of Power and Energy

- Will start publishing articles from January 2020
- Existing OA Journal of Power and Energy Technology Systems will be rebranded with this **new name**, scope covering the entire field of PES for both practice-oriented and academic articles
- Article processing charge subsidised at **US\$1350**
- Between 10-15 articles each year will receive further subsidy depending on authors' affordability/circumstances

## PES Full Open Access Option #2

A **dedicated section on Power & Energy** for publishing papers in the PES field in **IEEE Access**

- The section will start from January 2020, submissions started in September 2019
- Paper will be handled by 3 PES-appointed Editors
- APC: **US\$1750**

# Impact Factor

# **Are we depending too heavily on Impact Factors?**

# Impact Factor from Journal Citation Reports

 the answer company  
**THOMSON REUTERS**

Products & Services About Us Careers

## Journal Citation Reports

The recognized authority for evaluating journals

**Description:**

Journal Citation Reports® offers a systematic, objective means to critically evaluate the world's leading journals, with quantifiable, statistical information based on citation data. By compiling articles' cited references, JCR helps to measure research influence and impact at the journal and category levels, and shows the relationship between citing and cited journals. Available in Science and Social Sciences editions.

To find out more, visit us on the [Web of Science™](#) website

Systematic and objective

## Impact Factor is not necessarily enough of a metric

Other attributes:

- Journal's reputation in the community is important
- For new and lesser known journals – look at the editorial board, their reputation

## **Other ways of judging a journal's value to the engineering community**

- 1. Number of Downloads** (IEEE uses this information for revenue distribution)
- 2. Patent Citations** (Available from IEEE)

# Follow-up Steps

## Process of Writing the Paper

Discuss the content among team members  
Literature search – Reference List  
Description of the Experiment/Model  
Results/Discussion  
Write the Conclusion  
Collect the components – Prepare the draft  
All members comment on the draft  
Produce the final copy

# I would like to see a broader IEEE

We need to ensure that we are “READY FOR RECOVERY”, when we get back to the “NEW NORMAL” after COVID-19. Let us enhance cooperation, collaboration and community spirit.

For this we need to make IEEE broader so that IEEE is more relevant to the work our members do regardless where they work.

We need more participation from volunteers globally in IEEE governance. A broader based IEEE will make the Institute more relevant to technologists and academics from all parts of the world.

I would like to see more **IEEE Senior Members** and **IEEE Fellows** from Regions **8, 9 & 10**
